

Position Display Monitors (PDM) - Questionnaire

Facility ID

Do you have Position Display Monitors (PDM) in your facility, located in the TRACON above the scope? Yes No

Does your facility use the PDM's? Meaning the info is updated and is in use by the controllers. Yes No

What is the impact to your facility if the PDM's fail prior to being replaced?

Is there any other info about the PDM's that you would like to provide?

Background info:

PDMs primarily display aeronautical graphics and textual information in a backlit panel.

They are not intended for navigation purposes but give air traffic controllers references to valuable aeronautical information. The maps support safety in the national airspace system.
