### [New OSHA Webinar: Drinking Water Testing](#)

NATCA's collective bargaining agreement requires drinking water testing every three years or more often if there is a reason to believe quality is compromised. Much can be learned from testing data, like what year buildings are problematic and how usage patterns affect water quality. Do acceptable results mean our water quality will be good for the next three years? Not necessarily. This webinar will explore things we can do to make sure the water we drink is safe.

The OSHA Committee, along with Geoff Bacci, will be holding a webinar regarding Drinking Water Testing on Feb. 21 at 1 p.m. EST. To register for the webinar, [click here.](#)
