ATSAP Webinar for NATCA Facility Representatives

Empowering Facility Reps with Tools and Insights for a Proactive Safety Culture

In the fast-paced, ever-evolving world of air traffic control, the safety of the National Airspace System depends on vigilance, transparency, and a shared commitment to learning from experience. The Air Traffic Safety Action Program (ATSAP) stands at the forefront of these efforts, providing controllers a confidential channel to report safety concerns, share lessons learned, and foster continuous improvement. Recognizing the pivotal role that NATCA facility representatives play in this process, we invite you to attend an informative ATSAP webinar designed specifically for FacReps.

Webinar Overview

This ATSAP webinar is tailored for NATCA facility representatives seeking to deepen their understanding of the program and ways to enhance local safety cultures. The session aims to demystify processes, including FacReps roles in ATSAP processes, and offer actionable strategies for supporting members and advocating for positive change within facilities across the nation.

Why Attend?

Participating in this webinar is an investment in your facility's safety culture and your own effectiveness as a representative. By attending, you will:

- Gain clarity on recent ATSAP trends and challenges facing the workforce
- Become empowered to assist controllers with reporting and navigating ATSAP processes
- Access real-time resources and contacts for ongoing support

Details
